

 **De Cloet**

PORTABLE HEATER

The De Cloet 600 Series Portable Construction Heater provides more clean dry heat than any other heater on the market in its class. It is designed to both warm and dry a building space.

Powered by Riello Burners, The De Cloet 600 is available in oil or gas, and provides 600,000 BTU's of clean, hot and dry air at over 7,000 cubic feet per minute.

The De Cloet 600 can heat directly, or the heat can be ducted through two 24" ducts 100 feet into a building or into existing ductwork. Fuel consumption can be lowered by recycling the air in a building, using cold air return ducts in the heater. Pressurizing a building with warm dry air will also accelerate then drying process.

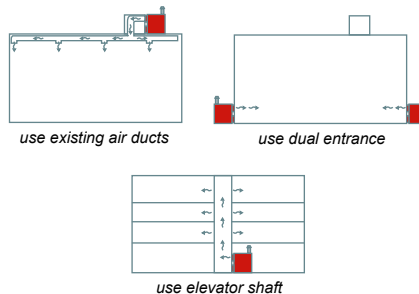

The De Cloet 600 incorporates over 30 years of heating/drying technology and experience of De Cloet Ltd. The same technology that you will find in the De Cloet 600 has been tested and tried by thousands of De Cloet Ltd. customers in North America and around the world.

SPECIFICATIONS

Output	600,000 BTU
Efficiency	82% NG & 85% LPG
Fuel Consumption*	600 ft ³ NG/Hr, 3.6 Gal Oil/Hr
Electrical Requirement	240 V, Single Phase, 30 Amp
Fan	7,200 CFM @ ½" SP
Remote Thermostat	On / Off
Duct Size	2 Outlets @ 24" OD 2 Inlets @ 24" OD
Dimensions	53" W x 72" L x 82" H
Approx Weight	1,600 lbs
Preset Duct Temp Limit	170 F
Preset Upper Limit	240 F
Preset Lower Limit	200 F

* Consumption will decrease as recycled air temperature rises.
Consumption figures based on constant firing.

SAMPLE USES

Heavy Duty All Steel Construction
Moveable with Forklift or Hoist
Fully Insulated
Ductable Heat and Return Air
Burner and Electrical Components in Secure Locked Cabinet

Stainless Steel Heat Exchanger
Centrifugal Fans Ensure Quiet Operation
Recycles Air = Increased Efficiency
Full Safety Features - 100% Safety Shut Down on Loss of Fuel or Airflow

Available in Natural Gas or Oil
CSA Approved

Optional Trailer and Accessories are Available
